Liberty Bay Foot & Ankle

Orthotic Coverage Questionnaire

Prescription orthotics are an effective medical treatment for many conditions affecting back, hips, knees, legs and feet. Orthotics are a cost effective treatment for correcting abnormal forces that may cause pain and deformity. The use of orthotics can eliminate and/or reduce the need for long-term drug therapy or surgical correction. Thus, many insurance companies cover them.

It is your responsibility as the patient to confirm whether or not your insurance carrier covers prescription orthotic devices. Please call your insurance company (the number is typically located on the back of your insurance card or available on the insurance company website) and check whether custom made orthotics are covered under your plan.

Please provide the insurance representative with the following

Procedure code: L 3000

Ask the insurance representative the following questions

Representative's name you spoke to: _____ Date: _____

"Are custom made orthotics a benefit under my plan?" YES NO

At what percentage will my orthotics be payable at? 100% 90% 80% other _____.

Do you have to satisfy a deductible first before any payment will be made? YES NO

How much is your deductible and has it been satisfied? _____

Is prior authorization required before your insurance will cover the orthotics? YES NO

If yes, what is required for pre-authorization? ___ Letter from our Office ___ Phone Call

___ Primary Care Physician Referral ___ Other.

If orthotics are covered, how many pair per calendar year (Jan-Dec) ____

or how many pair per 12 consecutive month period ____

Any additional notes or comments:

The benefits that have been quoted to you are not a guarantee of coverage. Benefits can only be determined once an actual claim has been submitted and reviewed for medical necessity.
